

IN THE CLAIMS

Claim 2 is amended and claim 21 is added. Claims 13-20 are canceled. All pending claims are reproduced below.

1. (canceled)
2. (currently amended) A method for providing data over an electronic network to a wireless computing device having a browsing program, comprising:

receiving a first ~~portion of the data for~~ that is part of a web page, the first data having a first display format;

changing the first data having a first display format to a second display format, wherein the second display format is capable of being displayed by the browsing program; ~~and~~

sending the changed data having the second display format to a display of the wireless computing device; and

~~before changing a second portion of data that is to be displayed on~~ after sending the changed data, receiving second data, where the first data and the second data are both part of the same web page on the as the first portion of the data.
3. (previously presented) The method as recited in claim 2 wherein said changing comprises:

compressing the received data.
4. (previously presented) The method as recited in claim 2 wherein said changing comprises:

stripping out a portion of the received data.

5. (previously presented) The method as recited in claim 2 wherein said changing comprises:

converting the received data from HTML to WML.

6. (previously presented) The method as recited in claim 2 wherein said changing comprises:

converting the received data from HTML to HDML.

7. (previously presented) The method as recited in claim 2 wherein said changing comprises:

converting the received data from HTML to PQA.

8. (previously presented) The method as recited in claim 2 wherein said changing comprises:

converting the received data from HTML to XHTML.

9. (previously presented) The method as recited in claim 2 wherein said changing comprises:

reformatting the received data.

10. (previously presented) The method as recited in claim 2 wherein said changing comprises:

assessing a type of the received data; and

changing the format in accordance with the type.

11. (previously presented) The method as recited in claim 2 wherein said changing comprises:

assessing a type of the browsing program; and

changing the format in accordance with the type.

12. (previously presented) The method as recited in claim 2 wherein said changing comprises:
assessing a size of the display on the wireless computing device;
assessing browsing program and device preferences set by the user; and
changing the format in accordance with the size and preferences.

13-20. (canceled)

21. (New) An apparatus, comprising:
a module to receive first data that is part of a web page, the first data having a first display format;
a module to change the first data having a first display format to a second display format, wherein the second display format is capable of being displayed by the browsing program;
a module to send the changed data having the second display format to a display of the wireless computing device; and
a module that, after sending the changed data, receives second data, where the first data and the second data are both part of the web page.
